

CEP

Case Enhancement Program

This is an entirely volunteer program, designed to assist the offender who has pending charges or is involved in an on-going case.

The intent is to provide a proactive, positive display of activity and lifestyle, which may improve the final disposition of their case. Offenders are expected to demonstrate a consistent commitment in the following areas: class attendance, payment for services, participation in twelve-step meetings, and other recommendations. These may include pro-social activities in the community, other self help programs and a regimen of random drug testing.

Senior Program staff provides progress reporting to the defense attorney and appears with testimony throughout the preliminary process and at sentencing, if requested by the defendant and/or defense attorney.

MISSION STATEMENT

“To reduce future court dockets by providing quality criminal intervention training and support in successful completion of judicial and/or probationary requirements.

We strive to enhance the lives of offenders by inspiring acceptance of social responsibility and personal accountability for actions.”

CAP PROGRAMS

All CAP programs are directed toward criminal intervention and compliance monitoring. CAP classes address re-orientation of the thinking that supports “Arrestable Behavior.” Damaged or unrealistic beliefs produce thinking that easily supports criminal activity either covertly or overtly. The topics and structures of all CAP programs are designed to address three areas of concern: 1) the prevalent activity which caused the arrest; 2) support and train the offender in successful probation completion; and 3) reinforce the lifestyle changes that prevent recidivism. Violation of the law is primarily caused by a combination of poor decision making due to inaccurate thinking, disregard for social boundaries, inability or unwillingness to assume responsibility and be accountable for personal choices and actions, and low coping, planning and adjustment skills.

SRA

Substance Related Arrest

This is a court ordered program in which the offender has a current or past case involving alcohol or drug charges. (Spanish classes are available for this program.)

ARA

Assault Related Arrest

This program addresses both the obvious outbursts of verbal and/or physical anger and the more subdued anger styles that actively contribute to self-destructive or high risk behavior. This program is intended for Assault & Battery (non-Domestic Violence) offenders. NOTE: This class is NOT intended for nor appropriate for Domestic Violence (Cases involving child abuse or abuse of a spouse or significant other.)

MBC

Making Better Choices

This program is designed to address the offender who demonstrates a problem with impulse control or obtaining financial gain through any illegal means. This program is appropriate for offenders with bogus check, larceny or burglary charges.

CBI

CAP Batterer’s Intervention Program

This is an Oklahoma Attorney General certified 52-week program which provides services to batterers, or perpetrators of domestic violence. This program is designed to hold a batterer accountable for the abusive behavior, provide consequences for engaging in violent or abusive behavior, provide monitoring of a batterer’s behavior and require a change in the batterer’s behavior and attitudes.

(Classes for Female Batterer’s are available.)

CAP Program Pricing

CBI Classes - \$25.00

DVI Assessments - \$50.00

SRA, ARA, MBC and CEP Classes - \$20.00
